

بسم الله الرحمن الرحيم ...

التعامل مع ASP.Net في PayPal

سوف نستخدم موقع PayPal Sandbox وهو عبارة عن موقع تجاري يتابع لPay Pal ويساعد مطوري المواقع لتجريب مشاريعهم ذات التعاملات التجارية قبل تطبيقها بصورة عملية ونشرها على الانترنت والسبب في ذلك بسبب حساسية التعاملات التجارية المتعلقة بالأموال ونقلها من حساب الى حساب اخر .

نبدا على بركة الله بخطوات بسيطة وهي :

او لا نبدا بانشاء حساب تجاري على الموقع التجاري في Pay Pal كما في (<https://developer.paypal.com/>) الصورة ادناه :

بعد النقر على ال Sign Up Now تظهر لنا الشاشة التالية ونبدا بملئ الحقول :

A screenshot of the 'Sign Up for Access to the Sandbox Test Environment' form. At the top left is a sidebar with 'Additional resources' links for 'Documentation', 'PayPal Developer Network', and 'Customer Support'. The main form area has a header 'PayPal Sandbox' and a sub-header 'Sign Up for Access to the Sandbox Test Environment'. It explains that the account will allow using the PayPal Sandbox Test Environment to try out various features. The form contains several input fields: 'First Name' (with a placeholder box), 'Last Name' (with a placeholder box), 'Email Address' (with a placeholder box), 'Password' (with a placeholder box and note 'At least 8 characters long, case sensitive.'), 'Confirm Password' (with a placeholder box), 'Security Question' (a dropdown menu with the option '-- select a question --'), 'Security Answer' (a text input field), and a 'Communications' section with a checked checkbox 'Please keep me informed on PayPal's Web Services, the PayPal Sandbox, and Developer Central.'.

بعد ذلك تذهب الى الايميل وتفتح الرسالة التي استلمتها من PayPal وتتقر على الرابط الموجود فيها .ستظهر لنا صفحة عن اكتمال التسجيل بنجاح :

The screenshot shows the PayPal Sandbox login interface. On the left, there's a 'Member Log In' form with fields for Email Address (Alsaady1988_eng@yahoo.com) and Password (redacted). A 'Log In' button is highlighted with a red circle. Below it is a link 'Trouble Logging In?'. To the right, a banner reads 'PayPal Sandbox Put your code to the test'. A green checkmark icon indicates success: 'You have successfully confirmed your account. Enter your username and your password to log in.' At the bottom, there's a 'Need an account? Sign up now to access PayPal's Sandbox Test Environment.' section with a 'Sign Up Now' button, and links for Documentation, PayPal Developer Network, and Customer Support.

بعد كتابة الايميل والباسورد والنقر على Login In ستظهر لنا الصفحة التالية نختار Test Account ثم Preconfigured :

The screenshot shows the PayPal Sandbox Test Accounts page. The left sidebar has 'Test Accounts' selected. The main area features a 'Test Accounts' section with instructions: 'Create a test business account to represent a merchant and a test personal account to represent a buyer.' It includes a 'New test account:' dropdown where 'Preconfigured' is selected and highlighted with a red circle. Below it are buttons for 'Create Manually' and 'Reset'. A note states: 'You do not have any test accounts. To get started, create a business account and personal account using the Create Account: Preconfigured feature. Click Help for more tips.' At the bottom, there are standard footer links: Fees | Privacy | Security Center | Contact Us | Legal Agreements | User Agreement, and Copyright © 1999-2011 PayPal, All rights reserved.

ثم نبدا بانشاء حساب للمشتري والبائع :

After creating the account, you can delete the account or you can provide additional information in the Sandbox Test Site. [How to automatically create verified accounts.](#)

Country

United States 

Account Type

- Buyer (Use to represent your customer's experience)
- Buyer In-Store (Use to represent your customer's experience with in-store checkout enabled)
- Seller (Use to represent yourself as the merchant)
- PayPal Payments Pro (Use to represent yourself as a merchant using Pro)

First Name (optional)

Last Name (optional)

We use this name for the Sandbox site only.

Login Email

alsaad @yahoo.com

This email address is only used inside the Sandbox.

Password

360915252

Your password must be at least 8 characters.

Add Credit Card

Visa 

Add Bank Account

- Yes
- No

Account Balance

\$ 5000 .00 USD

Notes

: Create Account  بعد ذلك ننقر على

Sandbox

[Home](#)

Test Accounts

[Test Email](#)[API and Payment Card Credentials](#)[Test Tools](#)

Additional resources

[Documentation](#)[PayPal Developer Network](#)[Customer Support](#)

PayPal Sandbox

Test Accounts

You have successfully created a test account. You can view email for this account on the Test Email tab.

- To test a merchant transaction, you must use a test Business Account.
- To test a buyer transaction, you must use a test Personal Account.

To simulate a transaction on PayPal.com, choose a test account.

New test account: [Preconfigured](#) [Create Manually](#)

Log-in Email	Payment Review	Negative Test Mode	Reset
<input checked="" type="radio"/> alsaad_1360915681_biz@yahoo.com Business Verified	Disabled	Disabled	Reset
View Details			

الآن انشئنا حساب للمشتري وننقر مرة اخرى على Preconfigured لانشاء حساب للبائع ستظهر لنا صفحة تحدد :
ونملأ باقي الحقول :

Account Type

- Buyer (Use to represent your customer's experience)
- Buyer In-Store (Use to represent your customer's experience with in-store checkout enabled)
- Seller (Use to represent yourself as the merchant)
- PayPal Payments Pro (Use to represent yourself as a merchant using Pro)

بذلك أصبح لدينا حسابين واحد للمشتري والاخر للبائع كما في الصورة :

The screenshot shows the PayPal Sandbox interface under the 'Test Accounts' section. A success message states: "You have successfully created a test account. You can view email for this account on the Test Email tab." Below this, instructions advise using a test Business Account for merchant transactions and a test Personal Account for buyer transactions. A note at the bottom suggests choosing a test account to simulate a transaction on PayPal.com.

Log-in Email	Payment Review	Negative Test Mode	Reset
alsaad_1360915681_biz@yahoo.com Business Verified	Disabled	Disabled	Reset
alsaad_1360915598_per@yahoo.com Personal Verified	Disabled	N/A	Reset

New test account: Preconfigured | Create Manually

Enter Sandbox Test Site | **Delete**

ثانياً : نفتح Visual Studio ونشئ مشروع جديد فارغ ول يكن اسمه PayPal

ثم نضيف قاعدة بيانات الى مشروعنا

على المشروع ونختار Add New Item ثم نختار Sql Server DataBase كما في الصورة ادناه Right Click MyDataBase ول يكن اسمها

ستظهر لك رسالة تخبرك هل ت تريد ان تكون قاعدة بياناتك في المجلد App_Data انقر على Yes

ثم من Server Explorer نبدا باضافة جدول الى قاعدة البيانات :

اسم الجدول Trade لحفظ البضائع التي تباع والحقول التي فيه هي :

Column Name	Data Type	Allow Nulls
pname	nvarchar(50)	<input checked="" type="checkbox"/>
pdesc	nvarchar(50)	<input checked="" type="checkbox"/>
price	nvarchar(50)	<input checked="" type="checkbox"/>
uname	nvarchar(50)	<input checked="" type="checkbox"/>

كذلك نضيف جدول اخر للبضائع اسمه Goods

Column Name	Data Type	Allow Nulls
ID	smallint	<input type="checkbox"/>
Name	nvarchar(50)	<input checked="" type="checkbox"/>
Description	nvarchar(100)	<input checked="" type="checkbox"/>
Price	nvarchar(50)	<input checked="" type="checkbox"/>
		<input type="checkbox"/>

Column Properties	
	A Z ↓
Full-text Specification	No
Has Non-SQL Server Subscriber	No
Identity Specification	Yes
Is Identity	Yes
Identity Increment	1
Identity Seed	1

ونحاول ان نملأ الجدول الثاني ببعض البيانات يدويا وبالإمكان عمل صفحة ثانية لادخال البضائع للجدول الثاني وكذلك بالامكان اضافة حقل اخر للجدول الثاني خاص بمسار صورة البضاعة

ثالثاً : نضيف WebForm الى مشروعنا ولتكن اسمها Default.aspx ونضيف داخلاً GridView ونربطه مع الجدول الخاص بالبضائع (Goods) واضفت فيه حقل لعرض صورة بيع اسميته Buy وكذلك نضيف Div يحوي دالة عن PayPal للتعرف بعمل PayPal وبالامكان الاستغناء عنها اذا اردت ليصبح كود الصفحة هكذا :

```
<%@ Page Language="C#" AutoEventWireup="true" CodeFile="Default.aspx.cs"
Inherits="_Default" %>

<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">

<html xmlns="http://www.w3.org/1999/xhtml">
<head runat="server">
    <title></title>
</head>
<body>
    <form id="form1" runat="server">
        <div>

            <asp:GridView ID="GridView1" runat="server" AutoGenerateColumns="False"
                DataKeyNames="ID" DataSourceID="SqlDataSource1" Width="914px">
                <Columns>
                    <asp:BoundField DataField="ID" HeaderText="ID"
InsertVisible="False"
                    ReadOnly="True" SortExpression="ID" />
                </Columns>
            </asp:GridView>
        </div>
    </form>
</body>
</html>
```

```

<asp:BoundField DataField="Name" HeaderText="Name"
SortExpression="Name" />
    <asp:BoundField DataField="Description"
HeaderText="Description"
        SortExpression="Description" />
    <asp:BoundField DataField="Price" HeaderText="Price"
SortExpression="Price" />
    <asp:TemplateField HeaderText="Buy " >
        <ItemTemplate>
            <asp:ImageButton ID="ImageButton1" runat="server"
CommandName="Buy"
                Height="33px" ImageUrl="~/Image/BuyNow.png"
Width="40px" CommandArgument="<%# ((GridViewRow) Container).RowIndex %>" />
        </ItemTemplate>
    </asp:TemplateField>
</Columns>
</asp:GridView>
<asp:SqlDataSource ID="SqlDataSource1" runat="server"
    ConnectionString="<%$ ConnectionStrings:ConnectionString %>"
    SelectCommand="SELECT * FROM [Goods]"></asp:SqlDataSource>

<br />
<div align="center" >
    <a href="#" onclick="javascript:window.open('https://www.paypal.com/cgi-bin/webscr?cmd=xpt/Marketing/popup/OLCWhatIsPayPal-outside','olcwhatispaypal','toolbar=no, location=no, directories=no, status=no, menubar=no, scrollbars=yes, resizable=yes, width=400, height=350');">
        <img alt="Solution Graphics" /></a>
    </div>
</div>
</form>
</body>
</html>

```

: وعند الاستعراض :

The screenshot shows a web browser window displaying a GridView. The grid has columns for ID, Name, Description, Price, and Buy. The 'Buy' column contains a blue shopping cart icon. Below the grid is a large yellow PayPal payment button with logos for MasterCard, VISA, American Express, Discover, and Bank.

ID	Name	Description	Price	Buy
1	Computer	Dell	450\$	
2	Mobile	Samsung	300\$	
3	Screen	Acer 14	120\$	
4	Switch	NetGear	50\$	
5	Server	Dell	2000\$	

: الان ناتي الى Web.Config ونضيف فيه :

```

<configuration>
    <appSettings>

```

```

<add key="token" value="PW1BDVNqVPVanwduF_Tb2Ey91aT1Uhx1kL7HPc-7e8S-6AnUwSSHyaSolSe"/>
<add key="paypalemail" value="alsaad_1360915681_biz@yahoo.com"/>

<!--Here i used sandbox site url only if you hosted in live change sandbox to live paypal URL--&gt;
&lt;add key="PayPalSubmitUrl" value="https://www.sandbox.paypal.com/cgi-bin/webscr"/&gt;

&lt;add key="FailedURL"
value="http://localhost:26437/PayPalIntegration/Failed.aspx"/&gt;

&lt;add key="SuccessURL"
value="http://localhost:26437/PayPalIntegration/Sucess.aspx"/&gt;

&lt;/appSettings&gt;

&lt;connectionStrings&gt;
&lt;add name="ConnectionString" connectionString="Data
Source=.\SQLEXPRESS;AttachDbFilename=|DataDirectory|\MyDataBase.mdf;Integrated
Security=True;User Instance=True"
providerName="System.Data.SqlClient" /&gt;
&lt;/connectionStrings&gt;
&lt;system.web&gt;
&lt;compilation debug="false" targetFramework="4.0" /&gt;
&lt;/system.web&gt;
&lt;/configuration&gt;
</pre>

```

ثم نعود الى صفحة Default.aspx ونعرف الاتصال مع قاعدة البيانات :

```

SqlConnection Conn = new
SqlConnection(ConfigurationManager.ConnectionStrings["ConnectionString"].ToString());
SqlCommand Cmd = new SqlCommand();

```

وفي الحدث GridView1_RowCommand نضيف الكود التالي

```

if (e.CommandName == "Buy")
{
    ImageButton img = (ImageButton)e.CommandSource;
    int Index = Convert.ToInt32(e.CommandArgument);
    GridViewRow Row = GridView1.Rows[Index];
    Label l1 = (Label)Row.FindControl("Label3");
    Label l2 = (Label)Row.FindControl("Label2");
    Label l3 = (Label)Row.FindControl("Label1");
    Session["user"] = "Mohamed";
    Cmd = new SqlCommand ("Insert Into Trade(pname,pdesc,price,uname)
values('"+ l1.Text + "','" + l2.Text + "','" + l3.Text.Replace("$","");
"')"+Session ["user"].ToString () + ")",Conn );
    Conn.Open();
    Cmd.ExecuteNonQuery();
    Conn.Close();
    string Url = "";
    Url += "https://www.sandbox.paypal.com/cgi-
bin/webscr?cmd=_xclick&business=" +
ConfigurationManager.AppSettings["paypalemail"].ToString();
    Url += "&first_name=Mohamed";
    Url += "&city=chennai";
    Url += "&state=tamilnadu";
    Url += "&item_name=" + l1.Text;
}

```

```

        Url += "&amount=" + 13.Text.Replace ("$", "");
        Url += "&shipping=5";
        Url += "&handling=5";
        Url += "&tax=5"; ;
        Url += "&quantity=1";
        Url += "&currency=USD";
        Url += "&return=" +
ConfigurationManager.AppSettings["SuccessURL"].ToString();
        Url += "&cancel_return=" +
ConfigurationManager.AppSettings["FailedURL"].ToString();
        Response.Redirect(Url);
    }
}

```

في الكود اعلاه قمنا بحفظ بيانات البضاعة التي ستبعع عند النقر على Buy ثم وجهنا المستخدم الى موقع PayPal حاملا معه بعض البيانات مثل اسم البضاعة وسعرها وعددها والعملة المستخدمة والضريبة الخ:

ID	Name	Description	Price	Buy
1	Computer	Dell	450\$	
2	Mobile	Samsung	300\$	
3	Screen	Acer 14	120\$	
4	Switch	NetGear	50\$	
5	Server	Dell	2000\$	

فبعد النقر على اي بضاعة ستفتح لنا الصفحة التالية :

Your order summary

Descriptions	Amount
Mobile	\$300.00
Item price: \$300.00	
Quantity: 1	
Item total	\$300.00
Tax	\$5.00

PayPal Electronic Communications Delivery Policy Consent

This will just take a minute and then you can complete your transaction.

We've updated our Electronic Communications Delivery Policy. Please read it and consent so we can send your account information electronically, including your payment confirmation.

Please confirm that:

Yes, I've read and agree to the [Electronic Communications Delivery Policy](#). I understand that PayPal will provide me with information about my account electronically. I confirm that I can access emails, web pages, and PDF files.

Agree and Continue

ننقر على Agree And Continue ثم ننقر على pay ثم ننقر على Agree And Continue في الختام هناك عدة ملاحظات مهمة :

كل الذي عملناه كان تجريبي وبعد ان تم بنجاح صار بامكاننا ان نطبقه بصورة فعلية بنفس الخطوات لكن بدل من الموقع نستبدل ب Web.config في PayPal.com وكذلك الايميل ...

كذلك بدل من "Login Name" نستخدم اسم الحساب للشخص في موقعنا Session["user"]="Mohamed" او اتركه فارغ ،

اتمنى ان ينال الدرس اعجابكم

لا تنسونا بصالح الدعاء في الغيب ،

واي استفسار او تصحيح خطأ يرجى مراسلتي على الايميل وساكون مشكورا لكم
