II -Reading Comprehension
Read the following passage then answer the questions below:
Ice skating is using metal-bladed ice skates to glide on the ice surface. Ice
skating may be performed on both indoors and outdoors, as well as on naturally
frozen water, such as ponds, lakes and rivers. Ice skating was brought to Britain
in the 17th century. The first skating club was formed in the 1740s. The next
skating club was in London and it was founded in 1830. Skating should be on ice
temperatures lower than -3.5 °C. Ice skating depends on the roughness of the ice,
the design of the ice skate, and the skill and experience of the skater.
A helmet should be worn. The danger of skating outdoors is falling through the ice
into the freezing water.
