These skills are extremely important for the future of the country. Because technology changes all the time, the skills that people need today are very different to what was needed ten or twenty years ago. There are now many more technical schools around Egypt and each school teaches a different kind of technical

To : Kamal  
From : Samy  
About : social networking sites

Hi Kamal,

Some people become addicted to using social networking sites. At first, they use them just to send messages to their friends and to find out what their friends are doing. However, some people need to check their social networking sites all the time. If they do not check them, they begin to worry or to feel unhappy. The best way to help these people is to suggest that they only use social networking sites for about half an hour. Suggest that they phone their friends instead of sending them messages. Encourage them to play a sport or make something instead of looking at their mobile phones!

All the best,  
Samy

About : the Ice Age

Hello Sara,

The Ice Age began 6 million years ago. There have been 11 different ice ages. The last ice age was called "The Great Ice Age", and it happened 11,000 years ago. During the "Great Ice Age" over third of the earth was covered in ice, and the air had less carbon dioxide in it.

Scientists believe there are two explanations of why the ice ages might have happened. They believe temperatures were much colder, so it never rained, only snowed, or the earth changed its tilt away from the sun. About 10,000 years ago, the earth began to warm up and the ice started to melt.

All the best,

Dalia

**Hello Peter,**

Did you know that the Red Sea is one of the warmest seas in the world. For this reason, hundreds of fish and animals live there. In fact, if we didn't have the Red Sea, the world would have 20 percent fewer kinds of fish. One of the special kinds of fish that live in the Red Sea is the sailfish. This is the fastest fish in the world. It can jump out of the water at 110 kmh. There are also more than 40 kinds of sharks. Some of these are up to three metres long, but not all of them are dangerous.

**Have a good time,**

**Ali**
