(.....) **5)** Read the following passage, then answer the questions: What is love? The writer of "The Chemistry of Love" believes that falling in love is influenced by our brain chemistry. This connection between the way we feel and the way our bodies function is his main concern. Falling in love gives you extra energy. Your heart beats faster and you feel optimistic. Love meets our emotional needs, <u>this</u> makes everything look possible and rosy and we work better. The book says we are programmed at birth to produce endorphins when we are in close relationships. It is nature's way of keeping us together. When the relationship ends – or we are afraid it might end – production of endorphins stops. What is remarkable in a relationship is the newness. You need newness, sharing and growth. The brain has to experience a change which creates excitement. That is why the great romances of literature are never between people who stay together. A. Once, a journalist was instructed to write an article on a new president's palace. When the article arrived, the editor read the first sentence and refused to publish **it**. The article began: "Hundreds of steps lead to the high wall which surrounds the president's palace." The editor at once sent a telegram telling the journalist to find out the exact number of steps and the The journalist set out to obtain these important facts. But he took a long time to send them and the editor got impatient. In another telegram he said if he didn't reply soon, he would be <u>fired</u>. A week later, the editor was informed that the poor man had been arrested and sent to prison. A. Give short answers to the following questions: 1- Who arrested the journalist? 2- Why was the editor impatient? 3- Where was the journalist asked to go? B. - 2) It is commonly thought that people watching violent films get excited and might want to perform violent acts in real life. The results of a test on two groups of children was that those who had played "Street Fighter" behaved more aggressively than the ones playing a peaceful video game. So we could say that the influence of watching violence is negative.
- 3) Nothing can live without energy. People, animals and plants need energy to live and machines need energy to work. Today, most of the energy we use still comes from fossil fuels like coal oil and gas, which have been formed underground over millions of years. Translate into English:

Reading For Adults

- 1)Hospital patients have been shown to recover from surgery more quickly when their hospital room offered a view of trees. The strong ties between people and trees are most evident in the resistance of community residents to removing trees to widen streets.
- 2)Poverty and social problems may lead some children to end up living in the streets. Sooner or later, street children will turn to a life of crime. The whole society should help these children grow up to become good citizens.
- 3) Every year Egypt celebrates the international Child's Day in November Prizes are given to children who successfully take part in the "Reading for All" competition. Creative children in the different branches of knowledge are honoured.
- 4) The choice to become a leader is not an easy one and there will not always be an easy path. You must possess some qualities and work on them. Learn how to be optimistic, patient, sensible, tolerant and understanding.
- 5)One of the environmental problems is the slight rise in the temperature of the earth .As the world becomes hotter, there could be serious changes in weather and widespread flooding as water level in seas and oceans rises .The heavy rains in various parts of the world this winter may be considered a warning to man to stop polluting the atmosphere.

The stem carries water and nutrients from the roots to the other parts. The leaves take in nutrients and light. All plants produce flowers to make seeds so another plant can grow. Plants need energy to grow, replace damaged cells, get rid of waste, and reproduce. Photosynthesis is the process by which plants make food. In this process, carbon dioxide and water combine in the presence of light to form food. Plants convert energy from the sun by absorbing it through their leaves. Chlorophyll, the green colour found in plants, helps plants make food. During photosynthesis, leaves use light and energy to change carbon dioxide and water into food, and then oxygen is released into the air.</li> <li><b>A. 6) Read the following passage, then answer the questions:

When we were in England last year, I went fishing with my friend, Mike. Early in the morning, we were sitting quietly by the side of a lake when we had an unpleasant surprise. We saw a duck come along with three ducklings padding cheerfully behind her. As we watched them, there was a sudden swirl in the water. We could see the wild jaws of a shark, and one of the ducklings was dragged below the surface.

This incident made Mike furious, and thought of finding a trick to get rid of the shark. On three successive mornings, we returned to the same place and used several different kinds of bait. On the third day, Mike was lucky. Using an artificial frog as bait, he managed to catch the shark. There was a desperate fight but Mike was determined to catch the shark and he succeeded.

The true wonder of Alexandria, as part of the ancient world, is still being discovered. It was more than just the location of the world-famous library. Now, ancient Alexandria, lost to us, is buried under hundreds of modem buildings. Egyptologists were convinced that its Royal Quarter must be buried under the sea where Antony and Cleopatra held court and Cleopatra killed herself rather than be taken a prisoner to Rome. For a decade, a team of divers, led by Goddio, a famous founder of the European Institute for Underwater Archaeology, searched the harbour for "the city under sea." In 1996, pictures of the harbour floor, taken from Goddio's search ship, showed the fallen selumns, blocks with Creek inscriptions, and a small statue bead thought to be of either fallen columns, blocks with Greek inscriptions, and a small statue head thought to be of either Antony or Caesarian the son of Cleopatra and Julius Caesar. Till now, the head has not been identified with absolute certainty.

#### A- Answer the following questions:

1- According to the passage, why is Alexandria a true wonder?

2- What results did Goddio and his team reach after their efforts?

3- What was the Royal Quarter thought to be the location for?

#### B- Choose the correct answer from a. b, c or d:

# 4- Cleopatra put an end to her life because......

- a) she was a prisoner in the Royal Quarter
- c) Antony killed himself in the Royal Quartet
- b) she didn't want to be captured d) the court was held in the Royal Quarter

One day a tea contractor, Mr. Chin, was working on an estate in Africa with his wife and son. He noticed a slight movement in the jungle, so he stopped to watch for a moment. To his astonishment, a large tiger appeared and came towards him. The tea contractor was a very brave man. He told his wife and son to run towards a nearby road, while he stopped to fight the tiger with a knife. The tiger sprang at Chin and knocked him down, but he managed wound it with his knife. As a result, the tiger and Chin knocked each other unconscious. Luckily, for Chin, a friend, called Mike, heard the noise of the fight and came to investigate. He found Chin and carried him to the road. Then he stopped a car and sent the injured man to a hospital, where <u>he</u> eventually recovered.

#### A- Answer the following questions:

6) Read the following passage, then answer the questions:

You would like to take good photographs of real-life situations but you have few ideas for pictures. I suggest you look around you. The everyday world is full of scenes being played by an everchanging group of actors. The main requirement for any photographer has little to do with technical matters. You must develop an awareness of the world around you, and you should learn to notice when a situation may develop to a point where you will be able to take a good picture.

Not every shot is going to be a winner. If you look at the works of even the best photographers, you will notice that dozens of pictures have to be taken only because they lead up to the successful shot of a situation that the photographer has obviously been observing through the lens. You may find that you have taken one or two pictures after the right moment has passed.

# A- Answer the following questions:

1- Looking at the work of the best photographers might be helpful. How?

- 2- What does the photographer have to do to get good shots?
- 3- "Not every shot is going to be a winner." Why?

# B- Choose the correct answer from a, b. c or d:

- 4- The real-life photography depends on .....
- a. searching for unusual situations b. being able to tell when a good situation is
- c. having a camera which is easy and quick to use d. being highly skilled in camera techniques

|   | The world population is increasing greatly. If this rate of the increase of population continues, the   |   |
|   | whole world will face famine and a lot of people will die of lack of food. It is a great problem that<br>scientists do their best to solve. We have great oceans and seas that cover most of the surface of |   |
|   | our earth. Unfortunately, their water contains salt and cannot be used to irrigate plants. Nowadays,  |   |
|   | there are ways of using sea water for irrigation. We could have giant floating farms around shores.   |   |
|   | They will get their water mostly from below. The crops are grown on platforms floating above the water. Beneath the platforms, water will evaporate and then condense on the underside leaving              |   |
|   | salt behind. Fresh water will pass into the soil in which the crops grow and thus feed the roots. The   |   |
|   | plants will benefit from rain that may fall, but will not depend on it. In this way, crops may be sufficient to the growing population.   |   |

| Olive oil has been used by people of the Mediterranean countries, Greece, Italy and Spain for<br>about 4000 years. Many people have realised the healthy benefits of using olive oil instead of other<br>oils. As well as tasting delicious and being the healthiest cooking oil, olive oil has many other uses<br>such as cosmetics, hair conditioners and soaps. It is a preservative which keeps fish and cheese<br>fresh for years. Perhaps more important, is olive oil's value as a medicine. Not only can eating<br>olive lowers the risk of serious diseases such as cancer and heart disease, it can also have a<br>healing effect on many stomach disorders and diseases. This could explain why people in the<br>Mediterranean countries tend to live longer. It will make your food taste better and your life last              |                            |  |  |

Pollination, the carrying of pollen from one flower to another, is necessary for the reproduction of plants and for the production of food. Scientists estimate that one third of our food depends on insects, mostly bees, for pollination. However, in recent years, there has been a big drop in the populations of pollinators worldwide. There are several reasons. The use of pesticides has had the side effect of killing pollinators. Air pollution prevents insects from smelling and finding flowers, which they need for food. Diseases are killing many insects. Growing cities are destroying the environments where pollinators live. Recently, shortages of fruit and vegetables in India were blamed on the loss of pollinators. Clearly, it is important that we find solutions quickly. A) Answer the following questions: 1- What is a pollinator? 2- Is pollen only carried by insects? Explain. 3- Why has the number of pollinators dropped? 4- Which is the best title for this text? a) The Importance of Bees b) Pollinators in India c) The Loss of Pollinators d) Where Have All the Flowers Gone? 5- How does air pollution affect pollination? a) Flowers can't make pollen. b) Insects can't smell the flowers, so they can't find them. c) Insects can't pollinate the flowers because they can't see them. d) Pollution kills insects. 6. Read the following passage, then answer the questions

Most students find university very different from school. One of the biggest differences is that university students are expected to manage their time themselves. Although staff will help, it is the students' responsibility to be in the right place at the right time and to hand homework in on time. The way teaching is organised is also very different from school.

At university, lectures teach classes that may last two or three hours and can include 300 – 400 students. There are usually other smaller classes where students can discuss subjects they find difficult, and from time to time lectures spend time with individual students, talking about work they have done. If students are not living at home while they are at university, there are many ordinary things they may have to do for themselves, such as cooking.

#### 5) Read the following passage, then answer the questions;

Flowers produce a fine powder called pollen, which is carried by the wind or by insects to other flowers of the same type so that they can produce seeds. Pollination, the carrying of pollen from one flower to another, is necessary for the reproduction of plants and for the production of food. Scientists estimate that one third of our food depends on insects, mostly bees, for pollination. But in recent years, there has been a big drop in the populations of pollinators worldwide. There are several reasons. The use of pesticides has had the side effect of killing pollinators. Air pollution prevents insects from smelling and finding flowers, which they need for food. Diseases are killing many insects. Growing cities are destroying the environments where pollinators live. Recently, shortages of fruit and vegetables in India were blamed on the loss of pollinators. Clearly, it is important that we find solutions quickly.

#### a. Give short answers to the following questions:

- 1. What is a pollinator?
- 2. Is all pollen carried by insects? Explain.
- 3. Give two reasons why the number of pollinators has dropped.

# b. Choose the correct answer from a, b, c or d:

- 4. Which is the best title for this text?
- a) The Importance of Bees

b) Pollinators in India

c) The Loss of Pollinators

- d) Where Have All the Flowers Gone?
- 5. How does air pollution affect pollination?
- a) Flowers can't make pollen. b) Insects can't smell the flowers to find them.
- c) Insects can't pollinate the flowers because they can't see them.
- d) Pollution kills insects.

# 6) Read the following passage, then answer the questions:

Machu Picchu, Peru, is situated more than 2,100 metres above sea level between higher mountains. It is divided into three areas. At the southern end is the agricultural area. This has large "steps" called terraces cut into the hillsides to make flat spaces for farming. A wall for defence crosses Machu Picchu and separates the agricultural area from the urban and religious areas at the northern end. The **urban** area has two districts. In the southeastern corner is a district of houses for the nobles. On the eastern side is an industrial district with houses and workshops for labourers. The religious area, on the western side, is on the highest ground. It has temples and

#### 5) Read the following passage, then answer the questions;

A geyser is a special type of hot spring in which steam and hot water erupt and are thrown into the air. Some geysers throw water up more than 45 metres. Some geysers erupt at regular intervals and are predictable. One of the most famous, Old Faithful, erupts about every 90 minutes. But most geysers are irregular and unpredictable.

Worldwide there are only about 1,000 geysers and half of them are in Yellowstone National Park, USA. Geysers are a rare phenomenon because they form only under certain hydrogeological conditions. If conditions change, geysers can become dormant or extinct. Natural phenomena such as prolonged droughts, earthquakes, or landslides can make this happen. So can human activities such as mining, building dams, throwing trash into the geyser vent, and dewatering by geothermal power plants. Even without human activities, the lifespan of geysers is at most a few thousand years.

#### a. Give short answers to the following questions:

- 1. Are all hot springs geysers? Give a reason for your answer.
- 2. Can people prevent all geysers from becoming dormant or extinct? Give a reason for your answer.
- 3. Where is the best place to see geysers?

#### b. Choose the correct answer from a, b, c or d:

- 4. What does hydrogeological mean?
- a) related to water and the earth
- c) made by water
- 5. What does so refer to here?
- a) geysers form
- c) make geysers become dormant or extinct
- b) natural phenomena

b) related to electricity

d) related to the earth and the sky

6) Read the following passage, then answer the questions:

I think that we should start a book club for secondary and university students in our town. We could read both Arabic and English books. We could have meetings every week or two in the summer, and once a month during the school year. Here is why I think we should do it. First, if we

have a book club, it will encourage us to read more. It is known that if people read a lot, they write better. So this will help us in two ways. Secondly, we will develop some responsibility if we take turns leading the discussion at meetings. The leader will have to read the book carefully. Thirdly, discussing books will help us to overcome any shyness. Everyone will have to say something. Reading good books will be a better way to use our time than playing games or reading comic books. Don't you agree with me?

### a. Give short answers to the following questions:

- 1. What kinds of students does the author want to have in the book club?
- 2. Do you think it is a good idea to have these kinds of students together? Give your reason.
- 3. How will the book club members develop responsibility?

#### b. Choose the correct answer from a, b, c or d:

- 4. What happens if people read a lot?
- a) They join a book club.
- c) They lead a discussion.
- 5. What does overcome mean here?
- b) They learn to write better.
- d) They are less shy.

- a) to not behave normally
- b) to fight and win against someone
- c) to control a feeling that prevents you from achieving something
- d) to be made extremely sick or unconscious

Yussuf looked at the piles of notebooks in the living room. He wanted to just throw them away. But he opened one notebook and started to read. Then he read another and another. His excitement grew. Some notebooks were filled with drawings and descriptions of clever gadgets. Others contained stories and novels that Adam had written. Yussuf cried. He had never realised that his younger brother was a storyteller and inventor.

# 6) Read the following passage, then answer the questions:

Pearls are made by oysters, a kind of shellfish. Sometimes a tiny bit of a plant or animal gets trapped in the soft body of the oyster. This bit irritates the oyster. Imagine how you would feel if you had something caught in your muscle. The oyster produces a liquid substance called nacre around the **foreign material** to protect its body. The oyster produces layers and layers of nacre, which harden to form a pearl. This is a slow process that can take three years or more.

For thousands of years, divers searched for pearls. Today, most pearls come from cultured pearl farms. Workers surgically place a bit of material inside the oysters. The oysters are raised in protected areas for several years until they produce a pearl. Wild pearls are very rare and expensive. Cultured pearls are more numerous, cheaper and just as beautiful as wild ones.

# a. Give short answers to the following questions:

1. Why do oysters produce nacre?

2. How long does it take to make a pearl?

3. Why do people use cultured pearls instead of wild pearls?
