Index

2^{k-1} factorial design, 373
2^{k} factorial design, 371
80–20 rule, 386

ABET accreditation requirements, 108, 193–195, 342, 348, 471
Abstract system, 34, 36, 51, 52
Affinity diagram, 316,
Affinity diagramming, 316, 358
Agent-based simulations, 125–128
Aggregate simulation, 126
Airframe CER, 147,157–160
Alias, 378
Aliasing structure factorial design, 379
Alternative-focused thinking (AFT), 366
Alternative generation approaches, 365–366
American Society for Engineering Management (ASEM), 12, 15
Army base realignment and closure (BRAC), 290, 308
Association for the Advancement of Engineering (AACE), 139
Arnold, Henry "Hap", 358
Athey's systematic systems approach, 285–286

Base realignment and closure, 290
Basic system models, 244
  K-out-of-*H* systems, 247
  parallel, 245
  series, 245
Bathtub curve, 231
Benchmarking, 366
  integrated, 366
Binomial distribution, 242
Bernoulli random variable, 242
Binomial distribution, 242
Blocking, 375
Blocking and randomization, 375
Bottom-up estimate, 143
Brainstorming, 72, 78, 79, 355–358, 361, 368, 387
  basic rules, 355
  critics, 356
  silent, 356
  structured, 356
  unstructured, 356
Brainwriting, 358
  structured, 358
  unstructured, 358
Breakeven analysis, 172

Decision Making in Systems Engineering and Management, Second Edition
Edited by Gregory S. Parnell, Patrick J. Driscoll, Dale L. Henderson

Bridge network, 247
Business-to-business collaboration, 187

California Institute of Technology (CalTech), 361
Candidate system solutions, 202, 221, 369, 397
  improved, 418
Censored data, 236
Chief information officer (CIO), 204, 205, 223, 345
Chief technology officer (CTO), 204, 223, 348
Client needs, 14
CMS system, 470, 474
Common discrete distributions, 242
Complete suspension system, 56
Complex adaptive systems (CAS) theory,
Complex systems, 228, 247, 249, 263,
Complexity, 187, 192
Component reliability importance measures, 249
Composite multilateral arrangement, 56
Concept map, 2
Conceptual model, 105–107
Conceptual system models, 70
Conduct cost analysis, 423, 424
Conduct sensitivity analysis, 409
Configuration control board (CCB), 202, 206, 208
Configuration management (CM), 200, 206, 213, 218
Confounded, 378
Confounding, 380
Consumer price index (CPI), 168
Continuous reliability distributions, 218
Continuous-time Markov chains (CTMCs), 253, 256
Contour plot, 385
Cost benefit analysis, 423
Cost estimation errors, 138, 142
  classification system, 139, 141
  source of, 142
Cost estimating relationships (CERs), 145, 148–150
Cost estimator's reference manual, 139
Costing, life cycle, 137
Costs:
  acquisition, 144
  direct, 144
  direct material, 144
  fixed, 144
  indirect, 144
  nonrecurring, 144
  recurring, 144
  types, 143
  variable, 144
Creative problem solving process, 355
Cumulative distribution function (CDF), 230, 265
Cumulative risk profile, 421–422
Curriculum management system (CMS), 230, 388, 439–442
Customer, 190
Cyclical search, 366

Decision analysis structures, 52
Decision authority, 5–7, 342
Decision-focused transformation, 424
Decision gate, 8
Decision makers, 298, 299, 302, 307, 319, 322, 395
  role of, 315
Decision quality chain, 278
Decomposition strategy, 41, 42
  life-cycle decomposition, 43
  role decomposition, 43
  subsystems decomposition, 43
Defense Acquisition University, 370
Delphi methods, 358
Department of Defense (DoD) satellite system, 217, 362
Deploy system, 69, 72
Descriptive models, 112, 121
Design engineers, 482
Design generator, 379
Design of experiments (DOE), 370
Design points, 371
Design review, 220
Deterministic dominance, 416
Deterministic methods, 141
Discipline engineer, 207
Discrete-time Fourier transform, 120
Discrete-time systems, 120
Dominated solution, 424
Dynamic probabilistic descriptive discrete (DPDD) processes, 187
Dynamic decision problem structuring, 278

Effects, interaction, 373
Elements, 3
Ends–means chains, 363
Engineer, industrial, 208
Engineer, test, 207
Engineering, disciplines, 3, 185
Engineering level, 142

organizational, 285
political, 284
social, 284
technological, 284
Environmental stress screening (ESS), 232
Equilibrium focused models, 113
Executive summary, 433
Exponential distributions processes, 233
Exponential failure distribution 254

Factorial design, principle fraction, 379
Factors, controllable and uncontrollable, 375
Feasibility screening, 366
Feasibility screening matrix, 367
Federal information processing standards (FIPS), 40
Fisher's process, 370
Fisher, Ronald, 370
Focus groups, 309
Fourier transforms, 120
Full factorial experiment, 379, 380, 383
Full-scale physical prototypes, 70, 71, 76
Function, 3, 14, 315
Functional analysis, 315
Functional architecture, 315
Functional flow diagram, 315
Functional hierarchy, 315
Fundamental objective, 326, 369
Fuzing system, 149, 157, 159

Generating relation, factorial design, 379
Geometric distribution, 243
Global lighting candidate solution, 412
Global optimal solutions, 118–119
Global weights, 327
Glue, 221
Graphical approach, 109
Groupthink, 357
Groupware, 361
Guaranteed life parameter, 238, 265

Half-fraction factorial design, 376
High-intensity discharge (HID) headlamps, 30
Hypercube, 375, 379
Hyper-Graeco Latin Square design, 385

Idea generation techniques, 355–365
survey of, 355
IDEF0, 323
limitations, 323
IDEF0 models, 40–50
activity, 43
diagram, 44
mechanisms, 43
Identity column, factorial design, 379
Importance measure, 249
Information technology (IT) system, 389
Input, outputs, controls, and mechanisms (ICOMs), 324
Institute for Operations Research and the Management Sciences (INFORMS), 2
Integrated logistics support (ILS), 219
Integration definition for modeling (IDEF0) 40, 323
Integration, system, 221
Interface control document (ICD), 218

Interview, 302

Janis, Irving, 357
Juran's confession, 387
Juran, Joseph, 386
Juxtaposition ideation, 365

K-out-of-*N* systems, 247
Keeney, Ralph, 363
Kolmogorov differential equations, 253–255

Laplace transforms, 120
Lateral thinking, 361
Latin Squares designs, 383
Law of the vital few, 386
Life cycle, 3, 66
adaptive model, 68
illustration, 66
ISO/IEC 15288, 74
planner, 222
predictive model, 68
rapid applications development, 76
spiral model, 76
team, 210
waterfall model, 76
Life-cycle cost estimator, 139
Life cycle costing (LCC) technique, 137ff,
Lillienthal, Otto data, 101
Linear programming, 117
Linear regression, 150, 154, 166, 173
Local weights, 327
Local optimal solutions, 118
Log-like function, 237
Loto modification ideation, 365

Management system, 68
Maintenance, condition-based, 73
Markov chains, 107, 256, 263
Markov decision processes, 121
Markov models of repairable systems, 253–263
Mathematical models in reliability, 229–241
Mathematical programming, 401
Mathematical structure approach, 50–53
Mathematical system models, 51
Maximum likelihood estimator (MLE), 236
Mean time to failure (MTTF), 232
Measure weights, 335
Measures of effectiveness (MOE), 11, 97, 307
Measures of performance (MOP), 97
Metaheuristic techniques, 118, 120, 121
Metasystems, 289, 294
Metaphoric connection ideation, 365
Method of moments, 234
Model, 99
  accreditation, 108
  approximation, 111
  characteristics, 112
  conceptual, 105
  constructed, 106
  validation, 107
  verification, 10
Model characteristics:
  continuous, 114
  discrete, 114
  dynamic, 113
  equilibrium, 113
  prescriptive, 112
  static, 113
  transient, 113
Model qualities:
  accuracy, 103
  balance, 103
  fidelity, 103
  parsimony, 102
  robustness, 103
  scale, 103
  simplicity, 103
Model toolbox, 109
Model tool linear programming, 117
Model type:
  graphical, 109
  mathematical, 110
  physical, 109
  schematic, 109
Modeling and simulation (M&S) process, 96, 107, 206
Modeling multiple machine problems, 258–260
Monte Carlo simulation analysis, 401, 415
Morphological analysis, 361
Multiagent system (MAS) simulations, 127–128
Multiobjective decision analysis (MODA) techniques, 401, 403, 410
Multiple objective decision analysis, 331
Myers-Briggs type indicator, 115

n-heads rule, 355
Needs, 14
Nested systems, 55
Net present value (NPV), 171–172, 180
Nonidentical machine problems, 261
Non-real-time simulations, 125
Nutt's taxonomy, 365

Objective(s), 3, 14
Occam's razor, 102
Operate system, 69, 72, 76, 87
Operational research, 205
Operational Research Society, 2
Optimizing solutions, 101–102
Osborn, Alex, 355
Osborn's process, 355–356
  disadvantages of, 357

Parallel system, 245
  important measure for, 250
Parallel thinking, 361
Parametric cost estimating, 146
Pareto, Vilfredo, 386
Pareto analysis, 385
Pareto principle, 386
