

سبايكر

من السلاح إلى الروح حتى

شروق الشمس

فكرة وتأليف: هاشم طالب هاشم

الأهداء

أهدي فكرتي المتواضعة هذه وكتابي البسيط إلى...

الذين ماتوا شهداء وأوفياء، على يدي الخونة فاستحقوا

الذين فقدوا وأهلهم لا يعلمون بهم، فأصبحوا وهماً يسيطر
على أعدائهم.

الذين فدوا العراق بكل غالٍ ونفيس ليفوزوا برضى الرحمن
الرحيم رب العرش العظيم

الذي جمعهم جريمة واحدة على أيدي عراقيين خونة باعوا
شرفهم وعرضهم لغيرهم كي يصلوا بهم ويجول مثلما يريد

....

سبايكر التي جمعهم كلهم لتصبح رمز التضحية والوفاء.

اعوذ بالله من الشيطان الرجيم
بسم الله الرحمن الرحيم
وصلى الله على سيدنا محمد وآل محمد الطيبين الطاهرين

سبايكر، مدينة الشهداء، ومدرسة علمت معنى الوفاء،
فأصبحت رمز التضحية، واحتضنت ابناء العراق بين
ذراعي شطها، لتخجل الخونة لكنهم لم يخجلوا، وتلونت بلون
الدماء، لتبين للعالم أن فيها أناس قد ماتوا بسفك لم يحدث من
قبل، لتنتصر رغم موتها ولتبقى حية بعد موت أهلها، ها انا
أضع بين أيديكم هذا الكتاب الغريب، وهو كتاب يبين أننا
وقادرون على فعل المستحيل أن

مثلهم ومثل من سكت عنهم. ولن نقبل بالظلم ولقد رأونا من
قبل كيف هي عزيمتنا، فنحن لم نكن ظلاماً يو
مظلومين فانتصرنا واشرقت علينا شمس الاحرار بسعادة
الانتصار بعد أن منّ الله به علينا، فلا تغرنهم خيانتهم
وسكوتنا عنهم، فنحن أسود لن نمسك بالفريسة إلا بعد أن
نعرف أين نجدها وكيف نمسكها، أما أنتم أيها الذئاب اللذين
أكلتم من فضلات الأسود لترون يوماً ما رأيتموه في حياتكم
ولتمحون من وجه الارض لظلمكم وخيانتكم والله لا يرضى

بالظلم ولا السكوت عنه، وسينصر المظلم بأذنه يوماً ما،
فانتظروا ذلك اليوم، لأنه قريب بأذنه تعالى وعند الله لا يضيع
شيء، ولا يقبل عذر، بل كل بأعماله فابحثوا عن أعمالكم
اعسى أن تستطيعوا تبييضها. أيها الخو
يا من قتلتم الأبرياء بحجة الطائفية، ووقفتم ضد أمر الله،
فانتظروا أمر الله بكم، فلو كانوا هؤلاء طيور جارحة لما
تسنى للناس ذبحها لكنكم كنتم ذئاباً خائنة التهمت شباباً في
عمر الورود، لتتكلوا أهلهم ظناً منكم أنكم ستنتصرون
الحق هو سينتصر والباطل سيزهق بأذن الجبار القهار،
سبحانه وتعالى.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 1.5 million to 2.5 million (Department of Health 2000).

There are a number of reasons why the public sector has become an important employer in the UK. One of the main reasons is that the public sector has become an important provider of social services, such as health care, education, and social care. The public sector has also become an important provider of infrastructure, such as roads, bridges, and public transport. The public sector has also become an important provider of housing and social services for the elderly and disabled.

The public sector has also become an important employer because it has become a major source of employment for people who are over 50 years of age. The public sector has also become an important employer for people who are from ethnic minority backgrounds. The public sector has also become an important employer for people who are from disadvantaged areas.

the 1990s, the number of people who are employed in the service sector has increased in all countries. The increase is most pronounced in the United States, where the service sector has become the dominant sector of the economy.

The increase in the service sector has led to a decline in the manufacturing sector. This is due to the fact that the service sector is more labour-intensive than the manufacturing sector. As a result, the service sector has absorbed a large number of workers who were previously employed in the manufacturing sector.

The increase in the service sector has also led to a decline in the agricultural sector. This is due to the fact that the service sector is more profitable than the agricultural sector. As a result, many farmers have left the industry and have moved to the service sector.

The increase in the service sector has also led to a decline in the public sector. This is due to the fact that the service sector is more tax-efficient than the public sector. As a result, many people have moved from the public sector to the service sector.

The increase in the service sector has also led to a decline in the manufacturing sector. This is due to the fact that the service sector is more labour-intensive than the manufacturing sector. As a result, the manufacturing sector has lost a large number of workers to the service sector.

The increase in the service sector has also led to a decline in the agricultural sector. This is due to the fact that the service sector is more profitable than the agricultural sector. As a result, many farmers have left the industry and have moved to the service sector.

The increase in the service sector has also led to a decline in the agricultural sector. This is due to the fact that the service sector is more profitable than the agricultural sector. As a result, many farmers have left the industry and have moved to the service sector.

the 1990s, the number of people who are employed in the service sector has increased in all countries. The increase is most pronounced in the United States, where the service sector has become the dominant sector of the economy.

The increase in the service sector has led to a change in the way that people work. In the past, people worked in a factory or office, where they were supervised by a manager. Now, people are more likely to work in a home office, where they are not supervised by a manager. This has led to a change in the way that people work, and it has led to a change in the way that people are paid.

The increase in the service sector has also led to a change in the way that people are paid. In the past, people were paid a fixed salary. Now, people are more likely to be paid on a commission basis, where their pay is based on the amount of business they bring in. This has led to a change in the way that people are paid, and it has led to a change in the way that people work.

The increase in the service sector has also led to a change in the way that people are paid. In the past, people were paid a fixed salary. the 1990s, the number of people who are employed in the service sector has increased in all countries. The increase is most pronounced in the United States, where the service sector has become the dominant sector of the economy. In the Netherlands, the service sector has also become the dominant sector, but the increase is less pronounced than in the United States.

The increase in the service sector is due to a number of factors. One of the main factors is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

Another factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A third factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A fourth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A fifth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A sixth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A seventh factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

Another factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people, and the need to ensure that the health care system is able to meet the needs of older people. The Department of Health (2000) has set out a strategy for the health care system to meet the needs of older people, and the Health Service Research Unit (2000) has set out a strategy for the health care system to meet the needs of older people.

The Health Service Research Unit (2000) has set out a strategy for the health care system to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that the health care system is able to meet the needs of older people; (2) to ensure that the health care system is able to meet the needs of older people; (3) to ensure that the health care system is able to meet the needs of older people.

the 1990s, the number of people with a mental health problem has increased in the Netherlands. The prevalence of mental health problems is estimated to be 15% in the general population (Van Tilburg *et al.* 2000). The prevalence of mental health problems is higher in the elderly population (Van Tilburg *et al.* 2000).

There are several reasons for the increase in the prevalence of mental health problems. One reason is that the elderly population is growing. Another reason is that the elderly population is living longer. A third reason is that the elderly population is becoming more socially isolated. A fourth reason is that the elderly population is becoming more dependent on others. A fifth reason is that the elderly population is becoming more vulnerable to mental health problems.

The elderly population is becoming more socially isolated. This is because many elderly people live alone. This is because many elderly people have lost their spouse. This is because many elderly people have lost their friends. This is because many elderly people have lost their family.

The elderly population is becoming more dependent on others. This is because many elderly people have physical disabilities. This is because many elderly people have cognitive disabilities. This is because many elderly people have mental health problems. This is because many elderly people have financial problems.

The elderly population is becoming more vulnerable to mental health problems. This is because many elderly people have a history of mental health problems. This is because many elderly people have a history of trauma. This is because many elderly people have a history of abuse.

The elderly population is becoming more vulnerable to mental health problems. This is because many elderly people have a history of mental health problems. This is because many elderly people have a history of trauma. This is because many elderly people have a history of abuse.

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (2000) has published a strategy for older people, which sets out a vision for the future of health care for older people. The strategy is based on the following principles: older people should be able to live independently, safely and with dignity; older people should be able to access the services they need; and older people should be able to participate in decisions about their care.

The strategy also sets out a number of key objectives, including: to improve the quality of life of older people; to reduce the number of older people who are in care; to improve the way in which health care is delivered to older people; and to ensure that older people are able to access the services they need. The strategy is a key document for the UK health care system, and it sets out a clear vision for the future of health care for older people.

There are a number of reasons why the public sector has become an important employer in the UK. One of the main reasons is that the public sector has become a major provider of social services, such as health care, education, and social housing. The public sector has also become a major provider of social insurance, such as unemployment benefits and state pensions.

The public sector has also become an important employer because it provides a large number of jobs that are not available in the private sector. For example, the public sector provides a large number of jobs in the health care sector, which is a sector that is essential for the well-being of the population. The public sector also provides a large number of jobs in the education sector, which is another sector that is essential for the well-being of the population.

the 1990s, the number of people who are employed in the service sector has increased in all countries. The increase is most pronounced in the United States, where the service sector has become the dominant sector of the economy.

The increase in the service sector has led to a decline in the manufacturing sector. This is due to the fact that the service sector is more labour-intensive than the manufacturing sector. As a result, the manufacturing sector has become less competitive in the global market. This has led to a decline in the number of jobs in the manufacturing sector.

The decline in the manufacturing sector has led to a decline in the number of jobs in the manufacturing sector. This is due to the fact that the manufacturing sector is more capital-intensive than the service sector. As a result, the manufacturing sector has become less competitive in the global market. This has led to a decline in the number of jobs in the manufacturing sector.

The decline in the manufacturing sector has led to a decline in the number of jobs in the manufacturing sector. This is due to the fact that the manufacturing sector is more capital-intensive than the service sector. As a result, the manufacturing sector has become less competitive in the global market. This has led to a decline in the number of jobs in the manufacturing sector.

The decline in the manufacturing sector has led to a decline in the number of jobs in the manufacturing sector. This is due to the fact that the manufacturing sector is more capital-intensive than the service sector. As a result, the manufacturing sector has become less competitive in the global market. This has led to a decline in the number of jobs in the manufacturing sector.

This is due to the fact that the manufacturing sector is more capital-intensive than the service sector. As a result, the manufacturing sector has become less competitive in the global market. This has led to a decline in the number of jobs in the manufacturing sector.

The decline in the manufacturing sector has led to a decline in the number of jobs in the manufacturing sector. This is due to the fact that the manufacturing sector is more capital-intensive than the service sector. As a result, the manufacturing sector has become less competitive in the global market. This has led to a decline in the number of jobs in the manufacturing sector.

The decline in the manufacturing sector has led to a decline in the number of jobs in the manufacturing sector. This is due to the fact that the manufacturing sector is more capital-intensive than the service sector. As a result, the manufacturing sector has become less competitive in the global market. This has led to a decline in the number of jobs in the manufacturing sector.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a more important part of the economy. Another reason is that the public sector has become a more attractive place to work. A third reason is that the public sector has become a more important part of the welfare state.

The increase in the number of people employed in the public sector has led to a number of changes in the way that the public sector is organized. One change is that the public sector has become more decentralized. Another change is that the public sector has become more market-oriented. A third change is that the public sector has become more customer-oriented.

The changes in the way that the public sector is organized have led to a number of challenges for the public sector. One challenge is that the public sector has become more complex. Another challenge is that the public sector has become more competitive. A third challenge is that the public sector has become more demanding.

The challenges that the public sector faces are a result of the changes in the way that the public sector is organized. The public sector must find ways to meet these challenges in order to continue to provide the services that it is responsible for providing.

One way that the public sector can meet these challenges is by increasing the number of people employed in the public sector. This can be done by recruiting more people to the public sector. Another way that the public sector can meet these challenges is by increasing the productivity of the people who are employed in the public sector.

Increasing the productivity of the people who are employed in the public sector can be done in a number of ways. One way is by providing more training and development opportunities for the people who are employed in the public sector. Another way is by providing more resources to the people who are employed in the public sector.

There are a number of other ways that the public sector can meet these challenges. The public sector must find ways to meet these challenges in order to continue to provide the services that it is responsible for providing.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a more important part of the economy. Another reason is that the public sector has become a more attractive place to work. A third reason is that the public sector has become a more important part of the welfare state.

One change is that the public sector has become more decentralized. Another change is that the public sector has become more market-oriented. A third change is that the public sector has become more customer-oriented.

The changes in the way that the public sector is organized have led to a number of challenges for the public sector. One challenge is that the public sector has become more complex. Another challenge is that the public sector has become more competitive. A third challenge is that the public sector has become more demanding.

The challenges that the public sector faces are a result of the changes in the way that the public sector is organized. The public sector must find ways to meet these challenges in order to continue to provide the services that it is expected to provide.

One way that the public sector can meet these challenges is by increasing the number of people employed in the public sector. This can be done by recruiting more people to the public sector. Another way that the public sector can meet these challenges is by increasing the productivity of the people who are employed in the public sector. This can be done by providing training and development opportunities for public sector employees.

The public sector must find ways to meet these challenges in order to continue to provide the services that it is expected to provide. The public sector must also find ways to ensure that the services that it provides are of high quality and that they are accessible to all people who need them.

The public sector has a long history of providing services to the people of the UK. The public sector has been a part of the welfare state since the 1940s. The public sector has been a source of pride for many people in the UK. The public sector must continue to provide the services that it is expected to provide in order to continue to be a source of pride for the people of the UK.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a more important part of the economy. Another reason is that the public sector has become a more attractive place to work. A third reason is that the public sector has become a more important part of the welfare state.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a major employer in the UK. Another reason is that the public sector has become a major employer in the health care sector. A third reason is that the public sector has become a major employer in the social care sector.

The increase in the number of people employed in the public sector has led to a number of changes in the way that the public sector is organized. One change is that the public sector has become more decentralized. Another change is that the public sector has become more marketized. A third change is that the public sector has become more privatized.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is funded. One change is that the public sector has become more dependent on government funding. Another change is that the public sector has become more dependent on private funding. A third change is that the public sector has become more dependent on user fees.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is managed. One change is that the public sector has become more hierarchical. Another change is that the public sector has become more bureaucratic. A third change is that the public sector has become more technocratic.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is evaluated. One change is that the public sector has become more performance oriented. Another change is that the public sector has become more cost oriented. A third change is that the public sector has become more customer oriented.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is perceived. One change is that the public sector has become more respected. Another change is that the public sector has become more valued. A third change is that the public sector has become more trusted.

The increase in the number of people employed in the public sector has also led to a number of changes in the way that the public sector is viewed. One change is that the public sector has become more visible. Another change is that the public sector has become more accessible. A third change is that the public sector has become more transparent.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 13.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One of the main reasons is the increase in the number of people who are employed in the public sector who are employed in health care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

Another reason for the increase in the number of people employed in the public sector is the increase in the number of people who are employed in the public sector who are employed in education. This is due to the fact that the number of people who are employed in the public sector who are employed in education has increased from 1.5 million to 2.5 million (Department of Health 2000).

A third reason for the increase in the number of people employed in the public sector is the increase in the number of people who are employed in the public sector who are employed in social care. This is due to the fact that the number of people who are employed in the public sector who are employed in social care has increased from 0.5 million to 1.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector who are employed in health care, education, and social care. One of the main reasons is the increase in the number of people who are employed in the public sector who are employed in health care, education, and social care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care, education, and social care has increased from 2.5 million to 3.5 million, 1.5 million to 2.5 million, and 0.5 million to 1.5 million (Department of Health 2000).

Another reason for the increase in the number of people employed in the public sector who are employed in health care, education, and social care is the increase in the number of people who are employed in the public sector who are employed in health care, education, and social care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care, education, and social care has increased from 2.5 million to 3.5 million, 1.5 million to 2.5 million, and 0.5 million to 1.5 million (Department of Health 2000).

A third reason for the increase in the number of people employed in the public sector who are employed in health care, education, and social care is the increase in the number of people who are employed in the public sector who are employed in health care, education, and social care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care, education, and social care has increased from 2.5 million to 3.5 million, 1.5 million to 2.5 million, and 0.5 million to 1.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector who are employed in health care, education, and social care. One of the main reasons is the increase in the number of people who are employed in the public sector who are employed in health care, education, and social care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care, education, and social care has increased from 2.5 million to 3.5 million, 1.5 million to 2.5 million, and 0.5 million to 1.5 million (Department of Health 2000).

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in the health sector has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase in the number of people employed in the public sector. One of the main reasons is the increasing demand for public services, particularly in the health sector. This is due to a number of factors, including an increasing population, an increasing number of people living longer lives, and an increasing number of people with chronic conditions. These factors have led to an increasing demand for public services, particularly in the health sector.

Another reason for the increase in the number of people employed in the public sector is the increasing number of people who are employed in the public sector who are employed in the health sector. This is due to a number of factors, including an increasing number of people who are employed in the public sector who are employed in the health sector. This is due to a number of factors, including an increasing number of people who are employed in the public sector who are employed in the health sector.

There are a number of reasons for this increase in the number of people employed in the public sector. This is due to a number of factors, including an increasing population, an increasing number of people living longer lives, and an increasing number of people with chronic conditions. These factors have led to an increasing demand for public services, particularly in the health sector.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people, and the need to ensure that the health care system is able to meet the needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to older people and the need to ensure that the health care system is able to meet the needs of older people.

The strategy for older people (Department of Health 2000) sets out the government's commitment to older people and the need to ensure that the health care system is able to meet the needs of older people. The strategy is based on the following principles:

- Older people should be able to live independently and actively in their own homes.
- Older people should be able to access the services they need to live independently and actively in their own homes.
- Older people should be able to access the services they need to live independently and actively in their own homes.

The strategy for older people (Department of Health 2000) sets out the government's commitment to older people and the need to ensure that the health care system is able to meet the needs of older people. The strategy is based on the following principles:

The decline in the manufacturing sector has been particularly large in the United States, where the manufacturing sector has lost a significant share of the economy.

The decline in the manufacturing sector has been particularly large in the United States, where the manufacturing sector has lost a significant share of the economy. The decline in the manufacturing sector has been particularly large in the United States, where the manufacturing sector has lost a significant share of the economy.

the 1990s, the number of people who are employed in the service sector has increased in all countries. The increase is most pronounced in the United States, where the service sector has become the dominant sector of the economy. In the Netherlands, the service sector has also become the dominant sector, but the increase is less pronounced than in the United States.

The increase in the service sector is due to a number of factors. One of the main factors is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

Another factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A third factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A fourth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A fifth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A sixth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A seventh factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

An eighth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One of the main reasons is the increase in the number of people who are employed in the public sector who are employed in health care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

Another reason for the increase in the number of people employed in the public sector is the increase in the number of people who are employed in the public sector who are employed in education. This is due to the fact that the number of people who are employed in the public sector who are employed in education has increased from 1.5 million to 2.5 million (Department of Health 2000).

A third reason for the increase in the number of people employed in the public sector is the increase in the number of people who are employed in the public sector who are employed in social care. This is due to the fact that the number of people who are employed in the public sector who are employed in social care has increased from 0.5 million to 1.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector who are employed in health care, education, and social care. One of the main reasons is the increase in the number of people who are employed in the public sector who are employed in health care, education, and social care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care, education, and social care has increased from 2.5 million to 3.5 million, 1.5 million to 2.5 million, and 0.5 million to 1.5 million (Department of Health 2000).

Another reason for the increase in the number of people employed in the public sector who are employed in health care, education, and social care is the increase in the number of people who are employed in the public sector who are employed in health care, education, and social care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care, education, and social care has increased from 2.5 million to 3.5 million, 1.5 million to 2.5 million, and 0.5 million to 1.5 million (Department of Health 2000).

A third reason for the increase in the number of people employed in the public sector who are employed in health care, education, and social care is the increase in the number of people who are employed in the public sector who are employed in health care, education, and social care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care, education, and social care has increased from 2.5 million to 3.5 million, 1.5 million to 2.5 million, and 0.5 million to 1.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector who are employed in health care, education, and social care. One of the main reasons is the increase in the number of people who are employed in the public sector who are employed in health care, education, and social care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care, education, and social care has increased from 2.5 million to 3.5 million, 1.5 million to 2.5 million, and 0.5 million to 1.5 million (Department of Health 2000).

لقد كتبت كتابي هذا بأوراق فارغة تبدأ باللون الأبيض ثم الأحمر، ثم الأخضر وتنتهي بالأصفر، فالأبيض للسلام، والأحمر للدماء، والأخضر يعني الانتهاء، والأصفر عنيت منه شروق الشمس. ولكل لون تفسير وهذه الطريقة الغريبة في تأليف الكتب رمزية ليفهم القارئ المقصود وفق تفكيره وعقله وكل له وجهة نظره.

مع تحياتي للجميع
